NAPLES – EXPERT VISIT

On November 14, 2021, the first visit of the series of Expert Visits (EV-2) has been successfully completed. Specifically five staff of FRC and two staff of CUT have visited the premises of UNINA, Naples, in order to discuss good practices and operation models for a research center. The UNINA (PLIVS – LUPT) personnel has demonstrated its lab facilities, moreover they proceeded to a series of presentations with the aim of information and dissemination of their work. A summary of each work is presented in the following pages.

UNINA (PLINIVS – LUPT): DISSEMINATION OF KNOWLEDGE

SEMINAR DAY - PRESENTATION OF TOPICS ABOUT CCA & DRR

The UNINA team gave a series of presentations of various topics about Climate Change Adaptation (CCA), Disaster Risk Reduction (DRR) and Sustainability of a Research Center as ISTOS or PLINIVS – LUPT.

Prof. Zuccaro and his team have prepared a series of presentations to share their knowledge and experience about certain topics of their expertise. The first day has started with prof. Zuccaro as the main

speaker presenting the work of his team about the Science role in Civil Protection activities and the administrative management and sustainability of PLINIVS - LUPT Study Centre. Following the presentation, Prof. Leone referred to various research projects that they have participated. The day ended with the members of the rest of the team presenting other topics relevant to the ISTOS project.

DISCOVERING NAPLES' NIGHT LIFE

Bourbon Tunnel, Naples

Café Bar near Historic Centre, Naples

After a full day at the university facilities, the FRC and CUT members went out to the market to visit the city, to see the sights such as Bourbon Tunnel (left photo), Palazzo Reale (Royal Palace), Castel Nuovo as well as to taste the local cuisine such as traditional cheese and sausage pies.

FUTURE ACTIVITIES

THE IMPORTANT ROLE OF THE COLLABORATION BETWEEN THE PARTNERS

The new year will be a particularly active year for ISTOS with many trips planned, starting with that in Thessaloniki where a group of students from the FRC and CUT will visit the AUTH facilities to meet the team of AUTH lead by Prof. K. Pitilakis, to talk about various issues related to the ISTOS project, to take a guided tour of the AUTH's lab and to discuss possible topics of research content for analysis and publication.

Upon returning to Cyprus, the research teams of FRC and CUT will prepare for the trip to Naples where the team of PLINIVS - LUPT and Prof. Zuccaro will host them for a series of seminars aimed at the training of students and professors.

Future activities also include the organization of virtual trainings and the first summer school of ISTOS. All the activities will be open for the participating researchers and students from all the research centers participating in the ISTOS program as well as from the staff of the public associations of Cyprus.
